EXPERIENCE

App Team Carolina, Chapel Hill, NC

February 2024 - Present

UI/UX Apprenticeship (August 2024 - Present)

- Advancing design expertise through in-depth weekly meetings focused on real-world production environments.
- Refining skills with regular demos and hands-on practice projects, applying feedback to elevate design outcomes.
- Engaging in collaborative critique sessions, leveraging peer and mentor insights to enhance design projects.

UI/UX Academy (February 2024 - May 2024)

- Learned foundational UI/UX design skills through comprehensive weekly meetings.
- Honed and applied industry-standard design principles on weekly hands-on projects.
- Utilized Figma to recreate Goodreads' interface and prototype a feature that underwent successful user testing.

E2D - Eliminate the Digital Divide, Charlotte, NC

November 2021 - August 2024

Computer Lab Technician

- Processed and refurbished thousands of decommissioned corporate laptops.
- Ensured each laptop went through the processes of cleaning, imaging, licensing, quality control, and shelving.
- Supported community outreach by aiding in the distribution of laptops to local communities and increasing digital accessibility.

Road to Hire, Charlotte, NC

June 2022 – July 2023

R2H Pre-Apprentice

- Learned and implemented various technical skills such as HTML/CSS, graphic design, and Excel.
- Facilitated professional communication through public speaking in both large and small group settings.
- Built and managed 3 technical projects from start to finish both individually and with a group.

Girls Who Code, Charlotte, NC

Summer Immersion Program Student

August 2022

- Selected to participate in a 2-week virtual program sponsored by BlackRock.
- Learned foundational concepts of HTML, CSS, and JavaScript through hands-on learning activities.
- Designed and developed several web projects, including a personal portfolio site, an interactive personality quiz, and an educational website on fast fashion awareness.

Accenture, Charlotte, NC

Winter Technology Intern

November 2020 – December 2020

- Completed a paid 4-week virtual internship with over 50 hours of work in data and market analysis, prototyping, and product design.
- Developed solutions to help small businesses adapt to the changing economy.
- Designed a food app concept focusing on the idea of connecting small restaurants with the local community.
